ADDENDUM NO. 1
CONTRACT #2009-10, BIOFILTER MEDIA

Please note the following change we feel is necessary in the section entitled "Biofilter Media Specifications" on Page 10:

Original Statement:

Biofilter Media Specifications: 4,300 cubic yards of uniformly mixed biofilter media. Media is to consist of a mixture of two (2) parts soft wood chips (hemlock is preferred but some white pine is acceptable), one (1) part soft wood bark mulch, and one (1) part leaf compost. Material size is to be between one (1) and three (3) inches.

Revised Statement:

Biofilter Media Specifications: 4300 cubic yards of uniformly mixed biofilter media. Media is to consist of a mixture of:
Two (2) parts soft wood chips. Hemlock is preferred, but white pine is acceptable. We will not accept any more than 50% white pine.
One (1) part soft wood bark mulch. Hemlock is preferred, but white pine is acceptable. We will not accept any more than 50% white pine.
One (1) part leaf compost. Leaf compost may contain no more than 5% grass clippings.
Material size for bark mulch and wood chips must be between one (1) and three (3) inches.

We apologize for the oversight. The bid opening date of September 3, 2009 at 10 am remains the same.
