5.2 Budget Amendment New Jet Truck Line Item 1045922-0021-6330

There is a line item in the approved 2022 budget for a new Jet Truck. The budgeted amount is \$172,095. Staff anticipated spreading this purchase over three years as we have done with other major pieces of equipment in the past. The prior leases were done with the equipment being the collateral. First Citizens Community Bank, who we had planned to use for the lease, can no longer use the equipment as collateral. Since we need to take delivery on the Jet Truck, Staff recommends the budget be amended to reflect the Jet Truck being purchased in full in 2022. This will require increasing the line item from \$172,095 to 457,541.44 with the funds to be taken from the Bond Redemption and Improvement Fund.

Recommendation: Increase line item 1045922-0021-6330 from \$172,095 to \$457,541.44 with funds to be taken from the Bond Redemption and Improvement Fund.

	Jet Truck Line Item Increase Approved	A motion was made by Mr. Auman, second by Mr. Derr to increase line item 1045922-0021-6330 from \$172,095 to \$457,541.44 with funds from the Bond Redemption and Improvement Fund. The motion passed unanimously.

Modifications to GD Kissinger Meadow Stream Augmentation

• The Authority's pending NPDES permit for the discharge of beneficial reuse water to Slab Cabin Run requires a series of modifications in control and monitoring. The changes will require modulation of the flows to the stream via SCADA, to avoid abrupt changes in stream flow. Additionally, we anticipate essentially a non-detect chlorine limit which will require dechlorination prior to stream discharge. We are working with staff to design, permit, and implement these modifications.

Modifications to GD Kissinger Meadow Stream Augmentation

The Authority's pending NPDES permit for the discharge of beneficial reuse water to Slab Cabin Run requires a series of modifications in control and monitoring. The changes will require modulation of the flows to the stream via SCADA, to avoid abrupt changes in stream flow. Additionally, we anticipate essentially a non-detect chlorine limit which will require de-chlorination prior to stream discharge. We are working with staff to design, permit, and implement these modifications.
